

SUBJECT INDEX

A

- Acetabularia*—alga (*Polyphysa*) protoplast differentiation, involvement of cytoskeletal elements, Zimmer & Werz 105; *mediterranea*, alga, heterogeneity of chloroplasts, Lüttke 483
- Acid release in rat caudal epididymal spermatozoa, extracellular sodium effect, Wong et al. 97
- Acronycine effect on division of rat leukemia cells, Low & Auersperg 15
- Actin—in *Ascaris lumbricoides*, nematode, sperm, Nelson & Ward 149; in oxyntic cell, Koenig et al. 319
- Adhesion—cell-substratum and cell-monolayer, dependent upon cellular cholesterol biosynthesis, Cavenee et al. 31; non-, mouse teratoma cells, isolation of aggregation inhibitory factor, Capelle et al. 470, sites, murine fibroblast cell-substratum, fibronectin pools, Murray & Culp 237
- Agar, autoclaved, containing granulocyte-macrophage colony growth inhibitor, Dixon et al. 478.
- Aggregation inhibitory factor, isolation from non-adhesive mouse teratoma cells, Capelle et al. 470
- Aging of chick embryo fibroblast, time-course studies on polyploid nucleus accumulation, Kaji & Matsuo 410
- Alga—*Acetabularia mediterranea*, heterogeneity of chloroplasts, Lüttke 483; *Polyphysa (Acetabularia)* protoplast differentiation, involvement of cytoskeletal elements, Zimmer & Werz 105
- Alignment on glass fibres, differences in normal and transformed cells, Fisher & Tickle 407
- Amoeba, *Dictyostelium discoideum*, auto-inhibitor of zygote giant cell formation, O'Day et al. 456
- Amoeboid motility in *Ascaris lumbricoides*, nematode, sperm, Nelson & Ward 149
- Ascaris lumbricoides*, nematode, sperm, amoeboid motility and actin, Nelson & Ward 149
- Antigen, blood group I and i, changes in expression and polarisation in post-implantation mouse embryos and teratocarcinomas associated with cell differentiation, Kapadia et al. 185
- Avian leukemia virus, cells, hematopoietic target, Graf et al. 331

B

- Behavior of rat Schwann cells in vitro, Dubois-Dalcq et al. 283
- Biochemical identification of cytokeratin proteins present in mammalian liver tissue hepatocytes, Franke et al. 299
- Biosynthesis, cellular cholesterol, dependency of cell-substratum and cell-monolayer adhesion, Cavenee et al. 31
- Blastoclastiella emersonii* zoospore, potassium-induced depolarization of transmembrane potential preceding encystment, Jen & Haug 79
- Blastomere, two-cell mouse embryo, polyethylene glycol-induced fusion, Spindle 465
- Burst-stimulating factor in chick erythroid cell culture, identification of ovotransferrin, Coll & Ingram 173

C

- Cardiac muscle cell, culture in serum-free media, Claycomb 231
- Cell—animal, permeability of junctions, Finbow & Pitts 1; cardiac muscle, culture in serum-free media, Claycomb 231; CHO and V79, metabolic cooperation following treatment with tumor promoter, Warren et al. 427; culture, chick erythroid, identification of ovotransferrin as heme-, colony- and burst-stimulating factor, Coll & Ingram 173; -cycle initiation rate in *Saccharomyces cerevisiae*, yeast, α -factor effect, Samokhin et al. 267; cycle progression and cyclic nucleotide fluctuations, absence of correlation, Oleinick et al. 373; cycle, transition probability model and transformed cell line, family tree analysis, van Zoelen et al. 395; *Dictyostelium discoideum*, amoebae, fusion with one another and with erythrocyte ghosts, Kuhn & Parish 89; differentiation, association of changes in expression and polarization of blood group I and i antigens in post-implantation mouse embryos and teratocarcinomas, Kapadia et al. 185; epithelial, lens, grown in culture, cell shape-mediated growth control, Iwig et al. 47; erythroleukemia, mouse, induction by microinjection of hexamethylene-bisacetamide (HMB), Diacumakos et al. 73; formation, zygote giant, auto-inhibitor in amoeba, *Dictyostelium discoideum*, O'Day et al. 456; ganglionic, chick embryo dorsal root, nerve growth factor (NGF) influencing potassium movements, Skaper & Varon 353; glioma, replacement of serum with defined medium increasing β -adrenergic receptor number, Dibner et al. 424; HeLa, nuclear shell, isolation and partial characterization, Hubert et al. 446; hybrid, teratocarcinoma-Friend, expression of globin genes, McBurney et al. 277; hybrid somatic, interspecific, analysis of mitochondrial DNA species, using restriction endonucleases, Hayashi et al. 458; leukemia, rat, acronycine and cytochalasin B effects on division, Low & Auersperg 15; leukemia, avian, hematopoietic target, Graf et al. 331; line L₆, influence of external diffusible factors on myogenesis, Delain et al. 217; line, leukemic, promyelocytic, human, induction of differentiation, Olsson & Olofsson 225; line, parent and virus-transformed, receptors for hyaluronate on surface, Underhill & Toole 419; line, rat liver epithelial, influence of culture conditions on cell morphology and tyrosine aminotransferase levels, Malan-Shibley & Iype 363; line, transformed, and transition probability model for cell cycle, family tree analysis, van Zoelen et al. 395; -monolayer adhesion dependent upon cellular cholesterol biosynthesis, Cavenee et al. 31; morphology in rat liver epithelial cell lines, influence of culture conditions, Malan-Shibley & Iype 363; mouse teratoma, non-adhesive, isolation of aggregation inhibitory factor, Capelle et al. 470; normal and transformed, differences in alignment on glass fibres, Fisher & Tickle 407; oxyntic, actin and myosin, Koenig et al. 319; pheochromocytoma, rat, effects of nerve growth factor (NGF) on Na⁺-, K⁺-pump, Boonstra et al. 452;

- porcine granulosa cultured in serum-free medium, enhanced multiplication and progesterone production, Stokfosowa et al. 430; rat Sertoli, temporal sequence of cell shape changes after experimental elevation of intracellular cAMP, Spruill et al. 131; Schwann, primary and secondary, rat, structure and behavior, Dubois-Dalcq et al. 283; shape changes in rat Sertoli cells after experimental elevation of intracellular cAMP, temporal sequence, Spruill et al. 131; shape-mediated growth control of lens epithelial cells grown in culture, Iwig et al. 47; -substratum adhesion dependent upon cellular cholesterol biosynthesis, Cavenee et al. 31; -substratum, murine fibroblast, adhesion sites, fibronectin pools, Murray & Culp 237; tumor, rat brain, 9L, depletion of polyamine content by DFMO treatment inhibiting proliferation and G1 to S transition, Seidenfeld et al. 209; tumor, correlation between bizarre colony morphology and metastatic potential, Cifone 435; two-mouse embryo blastomeres, polyethylene glycol-induced fusion, Spindle 465; vegetative *Labyrinthula*, formation of whirling aggregates, Nakatsuji et al. 412; whole-, transmission electron microscopy (TEM) revealing cytochalasin B effects on cytoplasmic contractile network, Britch & Allen 161
- Cellular—cholesterol biosynthesis dependence, cell-substratum and cell-monolayer adhesion, Cavenee et al. 31; extra-, sodium effect on acid release and motility initiation in rat caudal epididymal spermatozoa, Wong et al. 97; intra-, cAMP, temporal sequence of cell shape changes in rat Sertoli cells after experimental elevation, Spruill et al. 131
- Chloroplast heterogeneity in *Acetabularia mediterranea*, alga, Lüttke 483
- Cholesterol biosynthesis, cellular, dependence of cell-substratum and cell-monolayer adhesion, Cavenee et al. 31
- Chromatin, macronuclear, mating type transformation by transfer in ciliate, *Paramecium tetraurelia*, Koizumi & Kobayashi 441
- Chromatoid body, [³H]uridine labelling in rat pachytene spermatocytes, Söderström 488
- Chromosome, fixed, DNase digestion revealing NORs in man, Gagné 476
- Ciliate—*Paramecium bursaria*, inhibition of lysosomal fusion with symbiont-containing vacuoles, Karakashian & Rudzinska 387; *Paramecium caudatum*, transplantation of germ nuclei, Fujishima & Hiwatashi 63; *Paramecium tetraurelia*, mating type transformation by transfer of macronuclear chromatin, Koizumi & Kobayashi 441
- Colchicine—inhibition and translocation of hepatocyte lysosomes following partial hepatectomy, Mori et al. 25; toxicity to rat hepatocytes, prevention by glucagon hydrocortisone and insulin, Galivan 379
- Colony—morphology, bizarre, correlation with metastatic potential of tumor cells, Cifone 435; -stimulating factor in chick erythroid cell cultures, identification of ovotransferrin, Coll & Ingram 173
- Contractile network, cytoplasmic, cytochalasin B effects revealed by whole-cell transmission electron microscopy (TEM), Britch & Allen 161
- Cyclic AMP, intracellular, temporal sequence of cell shape changes in rat Sertoli cells after experimental elevation, Spruill et al. 131
- Cytochalasin B effects—on cytoplasmic contractile network revealed by whole-cell transmission electron microscopy (TEM), Britch & Allen 161; on division of rat leukemia cells, Low & Auersperg 15
- Cytokeratin proteins present in mammalian liver tissue hepatocytes, biochemical and immunological identification, Franke et al. 299
- Cytoplasmic contractile network, cytochalasin B effects revealed by whole-cell transmission electron microscopy (TEM), Britch & Allen 161
- Cytoskeletal elements and their involvement in *Polyphysa (Acetabularia)*, alga, protoplast differentiation, Zimmer & Werz 105

D

- Deoxyribonuclease digestion of fixed chromosomes specifically revealing NORs, Gagné 476
- Deoxyribonucleic acid (DNA)—in frog embryos, base composition of nuclear RNA, transcription, Flickinger & Shepherd 57; species, mitochondrial, in interspecific hybrid somatic cells, analysis using restriction endonucleases, Hayashi et al. 458
- Depolarization, potassium-induced, of transmembrane potential in *Blastocladiella emersonii* zoospores preceding encystment, Jen & Haug 79
- Dictyostelium discoideum*, amoebae—auto-inhibitor of zygote giant cell formation, O'Day et al. 456; cell fusion with one another and with erythrocyte ghosts, Kuhn & Parish 89
- Differentiation—cell association, changes in expression and polarization of blood group I and i antigens in post-implantation mouse embryos and teratocarcinomas, Kapadia et al. 185; induced in human promyelocytic leukemic cell line, Olsson & Olofsson 225; protoplast, *Polyphysa (Acetabularia)*, alga, involvement of cytoskeletal elements, Zimmer & Werz 105
- Diffusible factors, external, influence on myogenesis of line L₆ cells, Delain et al. 217
- D,L- α -Difluoromethylornithine (DFMO) treatment, inhibition of proliferation and G1 to S transition depleting 9L rat brain tumor cell polyamine content, Seidenfeld et al. 209
- Digestion, DNase, of fixed chromosomes specifically revealing NORs in man, Gagné 476
- Division of rat leukemia cells, acronycine and cytochalasin B effects, Low & Auersperg 15

E

- Egg, sea urchin, *Strongylocentrotus purpuratus*, inter-specific fusion, Bennet & Mazia 197
- Electron microscopy, transmission (TEM), whole-cell, revealing cytochalasin B effects on cytoplasmic contractile network, Britch & Allen 161
- Embryo—chick, dorsal root ganglionic cells, nerve growth factor (NGF) influencing potassium movements, Skaper & Varon 353; chick, fibroblast, aging, time-course studies on polyploid nucleus accumulation, Kaji & Matsuo 410; frog, base composition of nuclear RNA transcribed from DNA, Flickinger & Shepherd 57; mouse, post-implantation, changes in expression and polarization of blood group I and i antigens associated with cell differentiation, Kapadia et al. 185; two-cell mouse blastomeres, polyethylene glycol-induced fusion, Spindle 465

- Encystment, preceded by potassium-induced depolarization of transmembrane potential in *Blastocladia emersonii* zoospores, Jen & Haug 79
- Enucleation of human fibroblasts, intermediate filaments, Laurila et al. 41
- Epithelial cell lines, rat liver, influence of culture conditions on cell morphology and tyrosine aminotransferase levels, Malan-Shibley & Iype 363
- Erythrocyte ghosts, fusion with *Dictyostelium* cells, Kuhn & Parish 89
- Erythroid cell cultures, chick, identification of ovotransferrin as heme-, colony- and burst-stimulating factor, Coll & Ingram 173
- Erythroleukemia cells, mouse, induction by microinjection of hexamethylene-bisacetamide (HMBA), Diacumakos et al. 73
- Evolution, heat, by human skin fibroblasts in monolayer culture, Schaarschmidt & Reichert 480
- F**
- Family tree analysis of transformed cell line and transition probability model for cell cycle, van Zoelen et al. 395
- Fibroblast—cell-substratum, murine adhesion sites, fibronectin pools, Murray & Culp 239; chick embryo aging, time-course studies on polyploid nucleus accumulation, Kaji & Matsuo 410; human, intermediate filaments in enucleation, Laurila et al. 41; human skin, heat evolution in monolayer culture, Schaarschmidt & Reichert 480
- Fibronectin pools in murine fibroblast cell-substratum adhesion sites, Murray & Culp 237
- Filament, intermediate, in enucleation of human fibroblasts, Laurila et al. 41
- Friend teratocarcinoma cell hybrids, expression of globin genes, McBurney et al. 277
- Fusion—*Dictyostelium discoideum*, amoebae, cells with one another and with erythrocyte ghosts, Kuhn & Parish 89; interspecific, of sea urchin, *Strongylocentrotus purpuratus*, eggs, Bennett & Mazia 197; lysosomal, with symbiont-containing vacuoles in ciliate, *Paramecium bursaria*, Karakashian & Rudzinska 387; polyethylene glycol-induced, of two-cell mouse embryo blastomeres, Spindle 465
- G**
- Gastropoda, mollusk, marine, presence of H2b histone in spermatozoa, Colom & Subirana 462
- Gene, globin, expression in teratocarcinoma-Friend cell hybrids, McBurney et al. 277
- Germ nuclei, transplantation in ciliate, *Paramecium caudatum*, Fujishima & Hiwatashi 63
- Ghost erythrocyte, fusion with *Dictyostelium discoideum*, amoebae, cells, Kuhn & Parish 89
- Glass fibre alignment, differences of normal and transformed cells, Fisher & Tickle 407
- Globin genes, alpha, embryonal carcinoma-derived, expression in Friend cell hybrids, McBurney et al. 277
- Glucagon preventing colchicine toxicity to rat hepatocytes, Galivan 379
- Glycan stimulation of macrophages, Seljelid et al. 121
- Granulocyte-macrophage colony growth, autoclaved agar containing inhibitor, Dixon et al. 478
- Growth—cone, spinal cord neurons, structural proteins, Jockusch & Jockusch 345; control, cell shape-mediated, of lens epithelial cells grown in culture, Iwig et al. 47; factor, nerve (NGF) effect on Na⁺, K⁺-pump in rat pheochromocytoma cells, Boonstra et al. 452; granulocyte-macrophage colony, inhibitor contained in autoclaved agar, Dixon et al. 478; nerve factor (NGF) influencing potassium movements in chick embryo dorsal root ganglionic cells, Skaper & Varon 353
- H**
- Heat evolution by human skin fibroblasts in monolayer culture, Schaarschmidt & Reichert 480
- HeLa cells, nuclear shell, isolation and partial characterization, Hubert et al. 446
- Hematopoietic target cells of avian leukemia viruses, Graf et al. 331
- Heme-stimulating factor in chick erythroid cell cultures, identification of ovotransferrin, Coll & Ingram 173
- Hepatectomy resulting in translocation of hepatocyte lysosomes, Mori et al. 25
- Hepatocyte—lysosomes, translocation following partial hepatectomy and its inhibition by colchicine, Mori et al. 25; mammalian liver tissue, biochemical and immunological identification of cytokeratin proteins, Franke et al. 299; rat, prevention of colchicine toxicity by glucagon, hydrocortisone and insulin, Galivan 379
- Heterogeneity of chloroplasts in *Acetabularia mediterranea*, alga, Lüttke 483
- Hexamethylene-bisacetamide (HMBA) induction of mouse erythroleukemia cells by microinjection, Diacumakos et al. 73
- Histone, H2b, presence in spermatozoa from marine gastropoda, mollusk, Colom & Subirana 462
- Hormonal control of meiosis in *Marthasterias glacialis*, starfish, oocytes, Dorée 115
- Hyaluronate on surface of parent and virus-transformed cell lines, receptor, Underhill & Toole 419
- Hybrid—cell, teratocarcinoma-Friend, expression of globin genes, McBurney et al. 277; somatic cells, interspecific analysis of mitochondrial DNA species using restriction endonucleases, Hayashi et al. 458
- Hydrocortisone preventing colchicine toxicity to rat hepatocytes, Galivan 379
- I**
- Immunological identification of cytokeratin proteins present in mammalian liver tissue hepatocytes, Franke et al. 299
- Implantation, post-, embryos, changes in expression and polarization of blood group I and i antigens, Kapadia et al. 185
- Inheritance, maternal, of proteins synthesized in mammalian mitochondria, Yatscoff et al. 417
- Inhibition—by colchicine and translocation of hepatocyte lysosomes following partial hepatectomy, Mori et al. 25; lysosomal fusion with symbiont-containing vacuoles in ciliate, *Paramecium bursaria*, Karakashian & Rudzinska 387; of proliferation and G1 to S transition following depletion of 9L rat brain

- tumor cell polyamine content by DFMO treatment, Seidenfeld et al. 209
- Inhibitor—auto-, of zygote giant cell formation in amoeba, *Dictyostelium discoideum*, O'Day et al. 456; granulocyte-macrophage colony growth contained in autoclaved agar, Dixon et al. 478
- Inhibitory factor, aggregation, isolation from non-adhesive mouse teratoma cells, Capelle et al. 470
- Insulin preventing colchicine toxicity to rat hepatocytes, Galivan 379
- Isolation of nuclear shell of HeLa cells, Hubert et al. 446
- J**
- Junction permeability between animal cells, Finbow & Pitts 1
- L**
- Labyrinthula* vegetative cells, formation of whirling aggregates, Nakatsuji et al. 412
- Lens epithelial cells grown in culture, cell shape-mediated growth control, Iwig et al. 47
- Leukemia—cells, rat, acronycine and cytochalasin B effects on division, Low & Auersperg 15; virus, avian, cells, hematopoietic target, Graf et al. 331
- Leukemic cell line, promyelocytic, human, induction of differentiation, Olsson & Olofsson 227
- Lymphoblast, EB-virus transformed, purification and characterization of human lysosomes, Harms et al. 251
- Lysosome—fusion with symbiont-containing vacuoles in ciliate, *Paramecium bursaria*, inhibition, Karakashian & Rudzinska 387; hepatocyte, translocation following partial hepatectomy and inhibition by colchicine, Mori et al. 25; human, from EB-virus transformed lymphoblasts, purification and characterization, Harms et al. 251
- M**
- Macrophage—glycan stimulation, Seljelid et al. 121; granulocyte colony growth inhibitor containing autoclaved agar, Dixon et al. 478
- Mammalian—liver tissue hepatocytes, biochemical and immunological identification of cytokeratin proteins, Franke et al. 299; mitochondria, protein synthesis, maternal inheritance, Yatscoff et al. 417
- Marthasterias glacialis*, starfish, oocytes, hormonal control of meiosis, Dorée 115
- Medium replacing serum, increasing β -adrenergic receptor number in glioma cells, Dibner et al. 424
- Meiosis in *Marthasterias glacialis*, starfish, oocytes, hormonal control, Dorée 115
- Membrane, trans-, potential, in *Blastocladia emersonii* zoospores preceding encystment, potassium-induced depolarization, Jen & Haug 79
- Metabolic cooperation in CHO and V79 cells following treatment with tumor promoter, Warren et al. 427
- Metastatic potential and bizarre colony morphology, correlation in tumor cells, Cifone 435
- Microinjection of hexamethylene-bisacetamide (HMBA) induction of mouse erythroleukemia cells, Diacumakos et al. 73
- Mitochondria, mammalian, protein synthesis, maternal inheritance, Yatscoff et al. 417
- Mitochondrial DNA species, analysis in interspecific hybrid somatic cells using restriction endonucleases, Hayashi et al. 458
- Mollusk, gastropoda, marine, presence of H2b histone in spermatozoa, Colom & Subirana 462
- Monolayer culture, heat evolution by human skin fibroblasts, Schaarschmidt & Reichert 480
- Morphology—cell, influence of culture conditions in rat liver epithelial cell lines, Malan-Shibley & Iype 363; colony, bizarre, correlation with metastatic potential of tumor cells, Cifone 435
- Motility—amoeboid, in nematode, *Ascaris lumbricoides*, sperm, Nelson & Ward 149; initiation in rat caudal epididymal spermatozoa, extracellular sodium effect on acid release, Wong et al. 97
- Movement, potassium, in chick embryo dorsal root ganglionic cells, influence of nerve growth factor (NGF), Skaper & Varon 353
- Multiplication, enhanced, of porcine granulosa cells cultured in serum-free medium, Stoktosowa et al. 430
- Myelocytic, pro-, leukemic cell line, human, induction of differentiation, Olsson & Olofsson 225
- Myogenesis of line L₆ cells, influence of external diffusible factors, Delain et al. 217
- Myosin in oxyntic cell, Koenig et al. 319
- N**
- Nematode, *Ascaris lumbricoides* sperm, amoeboid motility and actin, Nelson & Ward 149
- Nerve growth—factor (NGF), effect on Na⁺, K⁺-pump in rat pheochromocytoma cells, Boonstra & van der Saag 452; factor (NGF) influencing potassium movements in chick embryo dorsal root ganglionic cells, Skaper & Varon 353
- Neuron, spinal cord, structural proteins in growth cone, Jockusch & Jockusch 345
- NOR in man revealed by DNase digestion of fixed chromosomes, Gagné 476
- Nuclear—macro-, chromatin in ciliate, *Paramecium tetraurelia*, mating type transformation by transfer, Koizumi & Kobayashi 441; RNA transcribed from DNA in frog embryos, base composition, Flickinger & Shepherd 57; shell, HeLa cells, isolation and partial characterization, Hubert et al. 446
- Nuclease, endo-, restriction, used in analysis of mitochondrial DNA species in interspecific hybrid somatic cells, Hayashi et al. 458
- Nuclei, germ, transplantation in *Paramecium caudatum*, Fujishima & Hiwatashi 63
- Nucleotide fluctuations, cyclic, and cell cycle progression, absence of correlation, Oleinick et al. 373
- Nucleus accumulation, polyploid time-course studies, aging of chick embryo fibroblast, Kaji & Matsuo 410
- O**
- Oocyte, *Marthasterias glacialis*, starfish, hormonal control of meiosis, Dorée 115
- Ovotransferrin, identification as heme-, colony- and burst-stimulating factor in chick erythroid cell cultures, Coll & Ingram 173
- Oxyntic cell, actin and myosin, Koenig et al. 321

P

- Pachytene spermatocytes, rat, [^3H]uridine labelling of chromatoid body, Söderström 488
- Paramecium*—*bursaria*, ciliate, inhibition of lysosomal fusion with symbiont-containing vacuoles, Karakashian & Rudzinska 389; *caudatum*, ciliate, transplantation of germ nuclei, Fujishima & Hiwataishi 63; *tetraurelia*, ciliate, mating type transformation by transfer of macronuclear chromatin, Koizumi & Kobayashi 441
- Permeability, junctions between animal cells, Finbow & Pitts 1
- Pheochromocytoma cells, rat, nerve growth factor (NGF) effects on Na^+ -, K^+ -pump, Boonstra et al. 452
- Polarization of blood group I and i antigen, changes in post-implantation embryos and teratocarcinomas of mouse associated with cell differentiation, Kapadia et al. 185
- Polyethylene glycol-induced fusion of two-cell mouse embryo blastomeres, Spindle 465
- Polyphysa* (*acetabularia*), alga, protoplast differentiation, involvement of cytoskeletal elements, Zimmer & Werz 105
- Porcine granulosa cells cultured in serum-free medium, enhanced multiplication and progesterone production, Stoktosowa et al. 430
- Potassium—induced depolarization of transmembrane potential in *Blastocladia emersonii* zoospores preceding encystment, Jen & Haug 79; movements in chick embryo dorsal root ganglionic cells, influence of nerve growth factor (NGF), Skaper & Varon 353
- Progesterone production, enhanced, of porcine granulosa cells cultured in serum-free medium, Stoktosowa et al. 430
- Progression, cell cycle, and cyclic nucleotide fluctuations, absence of correlation, Oleinick et al. 373
- Proliferation inhibition by depletion of 9L rat brain tumor cell polyamine content by DFMO treatment, Seidenfeld et al. 209
- Promoter tumor, treatment followed by metabolic cooperation in CHO and V79 cells, Warren et al. 427
- Protein—cytokeratin, present in mammalian liver tissue hepatocytes, biochemical and immunological identification, Franke et al. 299; structural, in growth cone of spinal cord neurons, Jockusch & Jockusch 345; synthesis, mammalian mitochondria, maternal inheritance, Yatscoff et al. 417
- Protoplast, *Polyphysa* (*acetabularia*), alga, differentiation, involvement of cytoskeletal elements, Zimmer & Werz 105
- Pump, Na^+ -, K^+ -, nerve growth factor (NGF) effect in rat pheochromocytoma cells, Boonstra et al. 452

R

- Receptor— β -adrenergic, replacement of serum with defined medium increasing number in glioma cells, Dibner et al. 424; for hyaluronate on surface of parent and virus-transformed cell lines, Underhill & Toole 419
- Ribonucleic acid (RNA)—nuclear, transcribed from DNA in frog embryos, base composition, Flickinger & Shepherd 57

S

- Saccharomyces cerevisiae*, yeast, α -factor effect on cell-cycle initiation rate, Samokhin et al. 267
- Schwann cells, rat, structure and behavior, Dubois-Dalcq et al. 283
- Sea urchin, *Strongylocentrotus purpuratus*, eggs, interspecific fusion, Bennett & Mazia 197
- Serum—free medium, cardiac muscle cell culture, Claycomb 231; -free medium, culture of porcine granulosa cells, enhanced multiplication and progesterone production, Stoktosowa et al. 430; replacement with defined medium increasing β -adrenergic receptor number in glioma cells, Dibner et al. 424
- Somatic cells, hybrid, interspecific, analysis of mitochondrial DNA species using restriction endonucleases, Hayashi et al. 458
- Species, mitochondrial DNA, analysis, in interspecific hybrid somatic cells using restriction endonuclease, Hayashi et al. 458
- Sperm, nematode, *Ascaris lumbricoides*, amoeboid motility and actin, Nelson & Ward 149
- Spermatocyte, rat pachytene, [^3H]uridine labelling of chromatoid body, Söderström 488
- Spermatozoa—marine gastropoda, presence of H2b histone, Colom & Subirana 462; rat caudal epididymal, extracellular sodium effects on acid release and motility initiation, Wong et al. 97
- Spinal cord neurons, embryonic mouse, structural proteins in growth cone, Jockusch & Jockusch 345
- Starfish, *Marthasterias glacialis* oocytes, hormonal control of meiosis, Dorée 115
- Strongylocentrotus purpuratus*, sea urchin eggs, interspecific fusion, Bennett & Mazia 197
- Structure—proteins in growth cone of cultured spinal cord neurons, Jockusch & Jockusch 347; rat primary and secondary Schwann cells in vitro, Dubois-Dalcq et al. 283
- Surface of parent and virus-transformed cell lines, receptors for hyaluronate, Underhill & Toole 419
- Symbiont-containing vacuoles in ciliate, *Paramecium bursaria*, inhibition of lysosomal fusion, Karakashian & Rudzinska 387
- Synthesis, protein, in mammalian mitochondria, maternal inheritance, Yatscoff et al. 417

T

- Teratocarcinoma-Friend cell hybrids, expression of globin genes, McBurney et al. 277; mouse, post-implantation, changes in expression and polarization of blood group I and i antigens associated with cell differentiation, Kapadia et al. 185
- Teratoma cells, mouse, non-adhesive, isolation of aggregation inhibitory factor, Capelle et al. 470
- Tissue, mammalian liver, hepatocytes, biochemical and immunological identification of cytokeratin proteins, Franke et al. 299
- Toxicity, colchicine, to hepatocytes, prevention by glucagon, hydrocortisone and insulin, Galivan 379
- Transfer of macronuclear chromatin in ciliate, *Paramecium tetraurelia*, mating type transformation, Koizumi & Kobayashi 441
- Transformation—cell line and transition probability model for cell cycle, family tree analysis, van Zoelen et al. 395; lymphoblasts, EB-virus, purification and characterization of human lysosomes, Harms et al.

- 251; mating type, by transfer of macronuclear chromatin in ciliate, *Paramecium tetraurelia*, Koizumi & Kobayashi 441
- Transition—G1 to S, inhibition of proliferation by depletion of 9L rat brain tumor cell polyamine content by DFMO treatment, Seidenfeld et al. 209; probability model for cell cycle and transformed cell line, family tree analysis, van Zoelen et al. 395.
- Translocation of hepatocyte lysosomes following partial hepatectomy and its inhibition by colchicine, Mori et al. 25
- Transplantation of germ nuclei in ciliate, *Paramecium caudatum*, Fujishima & Hiwatashi 63
- Tumor—cell correlation between bizarre colony morphology and metastatic potential, Cifone 435; cell, depletion of 9L rat brain, polyamine content by DFMO treatment inhibiting proliferation and G1 to S transition, Seidenfeld et al. 209; promoter, treatment followed by metabolic cooperation in CHO and V79 cells, Warren et al. 427
- Tyrosine aminotransferase levels in rat liver epithelial cell lines, influence of culture conditions, Malan-Shibley & Iype 363
- U**
- Uridine, tritiated, labelling of chromatoid body in rat pachytene spermatocytes, Söderström 488
- V**
- Vacuole, symbiont-containing, in ciliate, *Paramecium bursaria*, inhibition of lysosomal fusion, Karakashian & Rudzinska 387
- Vegetative cells, *Labyrinthula*, formation of whirling aggregates, Nakatsuji et al. 412
- Virus—EB-, transformed lymphoblasts, purification and characterization of human lysosomes, Harms et al. 251; leukemia avian cells, hematopoietic target, Graf et al. 331; transformed cell lines, receptor for hyaluronate on surface, Underhill & Toole 419
- Whirling aggregates, formation by *Labyrinthula* vegetative cells, Nakatsuji et al. 412
- Y**
- Yeast, *Saccharomyces cerevisiae*, α -factor effect on cell-cycle initiation rate, Samokhin et al. 267
- Z**
- Zoospore, *Blastocladiella emersonii*, potassium-induced depolarization of transmembrane potential preceding encystment, Jen & Haug 79
- Zygote giant cell formation in amoeba, *Dictyostelium discoideum*, auto-inhibitor, O'Day et al. 456
