

CALL FOR PAPERS,  
SPECIAL ISSUE OF *TELEMATICS AND INFORMATICS*

*Theme*

**Multimedia Technologies, Systems, and Applications**

*Editors*

Sorel Reisman  
California State University at Fullerton  
and Gayle J. Yaverbaum  
Penn State Harrisburg

Multimedia computing is attracting the ever-increasing attention of all walks of society, from kindergarteners through executives who manage large multinational corporations. Given the magnitude of the impact of multimedia and the perceived benefits brought about by its integration into computer systems, we are devoting this special issue to expanding the understanding of this emerging discipline.

The objectives of this special issue are as follows:

- To present reviews of foundation issues in multimedia.
- To advance the knowledge of how to best integrate multimedia into both business and education.
- To investigate both hardware and software issues that are prevalent in supporting multimedia application.

The diversity of the various areas of multimedia suggest that there are fundamental principles common to a wide range of developers and users of this technology. By bringing together selected appears, we hope to deepen the knowledge and understanding of multimedia as a true discipline.

We are interested in empirical research that examines methods and how people and organizations use multimedia technology to promote excellence. Topics include (but are not limited to):

MM development tools  
Issues concerning MM development  
Applications of MM  
Tutorial reviews of key issues, technologies, or methodologies  
MM and Super Information Highway (e.g., the World Wide Web)  
Case Studies in MM application.

Manuscripts must be submitted in triplicate to Dr. Sorel Reisman, Department of Management Science/Information Systems, California State University, Fullerton, CA 92634. The entire manuscript should be approximately 20 to 30 double spaced pages with 1" margins on all four sides. The first page of the manuscript must include title, author names and affiliations, corresponding author's address, phone, and email address. The second page of the manuscript should not include the authors name, but should contain the article title and an abstract of no more than 250 words.

References, also double spaced, should be prepared using the American Psychological Association style. Authors, whose submission is accepted for publication, will be required to submit the article in final form on a disk. The deadline for the final submission of manuscripts is February 15, 1996. Authors will be notified about the results of the review process by June 1. Inquires are welcome. Contact either of the quest editors:
