

Announcement

3RD NIH-Sponsored Symposium on The Development of Iron Chelators for Clinical Use

May 20–22, 1992

Gainesville, Florida

Sponsored by
National Institutes of Health's
National Heart, Lung, and Blood Institute
National Institute of Diabetes, Digestive, and Kidney
Diseases
University of Florida Department of Medicinal Chemistry

The principle objective of the program is to assess the status of iron chelation therapy in medicine with a look to current needs as they relate to future directives. The impact of iron chelation in several disease states and health problems will be reviewed including iron overload, reperfusion injury and malaria. The intent is to coordinate both basic science and clinical studies as they relate to the design of improved therapies.

Organizing committee includes Professor Raymond J. Bergeron, University of Florida; Professor John B. Neilands, University of California at Berkeley; University Professor Elizabeth C. Theil, North Carolina State University; Professor Gary M. Brittenham, Case Western Reserve University.
