**Condensation of Chloroform with Fluorinated Olefins in Basic Milieu.**

— The fluorinated olefins (I) react with chloroform (II) in the presence of tert-butoxide or a phase-transfer catalyst to give the olefins (III) and (IVa) and the cyclopropane (Vb). — (NGUYEN, T.; WAKSELMAN, C.; J. Fluorine Chem. 55 (1991) 3, 241-248; CERCOA-CNRS, 94320 Thiais, Fr.; FR)
