

structure (organic substances)

K 9000

31 - 039

X-Ray Structure and Absolute Configuration of 9,9-Dimethoxy-1-methyl-4-isopropenyl-7-endo-phenylsulfonylbicyclo(4.3.0)nonan-2-one. — As previously described, annulation of (I) with (II) affords the major diastereomer (III). The minor diastereomer (IV) is now isolated in order to determine its stereochemistry. — (TINANT, B.; DECLERCQ, J. P.; DEMILLEQUAND, M.; Bull. Soc. Chim. Belg. 102 (1993) 2, 143-144; Lab. Chim. Phys. Cristallogr., Univ. Cathol. Louvain, 1348 Louvain-la-Neuve, Belg.; EN)
