

Subject Index

Acetylenes

The interaction between silyl groups and acetylenes 101

α -Alanine

On the structures of free glycine and α -alanine 141

Butatriene

The molecular structure and quadratic force field of tetramethylbutatriene (2,5-dimethyl-2,3,4-hexatriene) studied by gas-phase electron diffraction and ab initio MO calculations, and adjunct ab initio studies of butatriene 153

Butyldisilane

An electron diffraction, ab initio and vibrational spectroscopic study of 1,2-di-*tert*-butyldisilane 215

Chlorine fluorosulfate (ClOSO₂F)

Vibrational spectra and gas phase structures of fluorine fluorosulfate (FOSO₂F) and chlorine fluorosulfate (ClOSO₂F) 111

Cold crystalline clusters

Inference of temperatures of cold crystalline clusters from lattice constants via Grüneisen's relation. An electron diffraction study 231

Dibromodioxotungsten

Molecular structure of dibromodioxotungsten by gas electron diffraction 71

1,3-Dioxole

Vibrational spectra and molecular mechanics and ab initio calculations for 1,3-dioxole. Confirmation of non-planarity 41

Divinylketone

The molecular structure of divinylketone studied by gas electron diffraction and ab initio MO calculations 95

Fluorine fluorosulfate (FOSO₂F)

Vibrational spectra and gas phase structures of fluorine fluorosulfate (FOSO₂F) and chlorine fluorosulfate (ClOSO₂F) 111

Fluorodichloroacetyl chloride

Conformational stability, barriers to internal rotation, ab initio calculations and vibrational assignment for fluorodichloroacetyl chloride 197

Free glycine

On the structures of free glycine and α -alanine 141

GaN

Organometallic precursors for the formation of GaN by MOCVD: the spectroscopic and gas-phase electron diffraction structural characterisation of Me₃Ga · NHMe₂ and [Me₂Ga (μ -NMe₂)]₂ 83

Gaseous benzene

Apparent wavelengths of the Oslo electron diffraction apparatus according to diffraction patterns from gaseous benzene 121

Grüneisen's relation

Inference of temperatures of cold crystalline clusters from lattice constants via Grüneisen's relation. An electron diffraction study 231

H₂O₂

Structural changes as a function of torsional motion studied by ab initio calculations. Part 4. The dependence of the dynamic behavior of the structural parameters for H₂O₂ and H₂S₂ on basis sets and comparison with experimental results 35

H₂S₂

Structural changes as a function of torsional motion studied by ab initio calculations. Part 4. The dependence of the dynamic behavior of the structural parameters for H₂O₂ and H₂S₂ on basis sets and comparison with experimental results 35

Hedberg rule

The Hedberg rule 265

Hexadiene

Conformational investigation of gaseous 1,5-hexadiene by electron diffraction and molecular mechanics 63

Iodopropane

Molecular structure and conformational composition of 1-iodopropane as determined from gas-phase electron diffraction, microwave spectroscopy data and ab initio calculations 75

Kekulene

Molecular vibrations and mean amplitudes of kekulene, including relevant historical glimpses 21

Lattice constants

Inference of temperatures of cold crystalline clusters from lattice constants via Grüneisen's relation. An electron diffraction study 231

Malonyl dichloride, $\text{ClC(O)CH}_2\text{(O)Cl}$

Gas-phase structure and conformational properties of malonyl dichloride, $\text{ClC(O)CH}_2\text{C(O)Cl}$ 51

 $[\text{Me}_2\text{Ga}(\mu\text{-NMe}_2)]_2$

Organometallic precursors for the formation of GaN by MOCVD: the spectroscopic and gas-phase electron diffraction structural characterisation of $\text{Me}_3\text{Ga} \cdot \text{NHMe}_2$ and $[\text{Me}_2\text{Ga}(\mu\text{-NMe}_2)]_2$ 83

 $\text{Me}_3\text{Ga} \cdot \text{NHMe}_2$

Organometallic precursors for the formation of GaN by MOCVD: the spectroscopic and gas-phase electron diffraction structural characterisation of $\text{Me}_3\text{Ga} \cdot \text{NHMe}_2$ and $[\text{Me}_2\text{Ga}(\mu\text{-NMe}_2)]_2$ 83

Methyl chlorothioformate

The molecular structure of methyl chlorothioformate by gas-phase electron diffraction and microwave spectroscopy data 13

Methyl ethyl nitrosamines

Rotational spectra of methyl ethyl and methyl propyl nitrosamines. Conformational assignment, internal rotation and quadrupole coupling 187

Methyl propyl nitrosamines

Rotational spectra of methyl ethyl and methyl propyl nitrosamines. Conformational assignment, internal rotation and quadrupole coupling 187

Methylation

The effect of methylation on the structure of uracil 173

Molecular potential functions

Analysis of diffraction data in terms of molecular potential functions 131

Monomeric CaF_2

The shapes and bending potentials of monomeric MgF_2 and CaF_2 249

Monomeric MgF_2

The shapes and bending potentials of monomeric MgF_2 and CaF_2 249

Oslo electron diffraction apparatus

Apparent wavelengths of the Oslo electron diffraction apparatus according to diffraction patterns from gaseous benzene 121

Silyl groups

The interaction between silyl groups and acetylenes 101

(Silylmethyl)cyclopropane

A combined ab initio and gas-phase electron diffraction investigation of the molecular structure and conformation of (silylmethyl)cyclopropane 239

Tetramethylbutatriene

The molecular structure and quadratic force field of tetramethylbutatriene (2,5-dimethyl-2,3,4-hexatriene) studied by gas-phase electron diffraction and ab initio MO calculations, and adjunct ab initio studies of butatriene 153

Torsional motion

Structural changes as a function of torsional motion studied by ab initio calculations. Part 4. The dependence of the dynamic behavior of the structural parameters for H_2O_2 and H_2S_2 on basis sets and comparison with experimental results 35

Uracil

The effect of methylation on the structure of uracil 173
