

**BIOMEDICAL ENGINEERING SOCIETY (BES)
SYMPOSIUM
Federation of American Societies
for Experimental Biology (FASEB)
St. Louis, Missouri
April 13–18, 1986**

PROGRAM

Sessions	Symposium Title/Chairperson
Session 1	The Use of Neuromagnetism to Evaluate Normal and Abnormal Neurological Function /J.P. Wikswo, Jr.
Session 2	In Vivo Assessment of Lung Endothelial Function: Theoretical Models and Measurement Methods/J.H. Linehan
Session 3	Applications of Computer Graphics and Modeling in Biomedical Sciences/W.F. Degrado
Session 4	Quantitative Analysis of Lung Fluid Balance/S.J. Lai-Fook
Session 5	Strides in the Technology of Systems Physiology and the Art of Testing Complex Hypotheses/J.B. Bassingthwaigte
