ANNOUNCEMENT

REPRODUCTIVE IMMUNOLOGY ANNUAL MEETING

THE PLACE The Eleventh Annual Meeting of the American Society for the Immunology of Reproduction will be held in Charlottesville, Virginia. The meeting is organized by Dr. John Herr and is sponsored in part by the University of Virginia Medical School.

THE DATES The dates are June 23–27, 1991.

THE LOCATION The meeting will be held at the Boar's Head Inn, situated two miles west of the University of Virginia. The Inn has excellent food, a pool, health club, indoor and outdoor tennis, and is adjacent to two golf courses.

THE AMBIANCE The Blue Ridge Mountains [and its many hiking trails] lie approximately twenty miles to the west. Monticello, the home of Thomas Jefferson, is about a fifteen minute drive. Montpelier, the home of James Madison, is approximately one hour by car.

NATURE OF MEETING FORMAT The meeting will be structured in accord with the characteristic Virginian sensibility to allow adequate time for reflection and discourse. There will be no simultaneous sessions, and the meeting will follow a continuous session format. Adequate time for discussion will follow each presentation. One afternoon will be "free" to absorb the ambiance of the Virginia Piedmont.

THE SCIENCE The science will be excellent. The Program Committee has organized sessions on the nature of antigenic epitopes, AIDS, Retroviruses and the Placenta, Immunotherapy, and Contraceptive Vaccine Immunogens.

SOCIAL EVENTS Social events planned include an after hours reception at Monticello with private tours of Mr. Jefferson's home and a banquet in the Rotunda at the University—a gathering that Mr. Jefferson himself wishes to attend.

INVITATION TO ATTEND Join us in Charlottesville. Program information may be obtained from:

John C. Herr, Ph.D.
Councillor and 1991 Program Organizer, ASIR

ANNOUNCEMENT

XTH INTERNATIONAL SYMPOSIUM ON ANATOMICAL SCIENCES 1-4 JULY 1991, Toronto, Canada

Program

Symposium: The Development of Embryonic Morphology

Chairman: Dr. B.K. Hall (Dalhousie University, Halifax, Canada).

Dr. Elizabeth Hay (Harvard University): Cell and Tissue Transformations in the Development of Early Embryonic Morphology.

Dr. Claudio Stern (Oxford University): Serial Repetition, Segmentation and the Development of Embryonic Morphology.

Dr. H.C. Slavkin (University of Southern California): Cell and Tissue Interactions and the Development of Craniofacial Morphology.

Symposium: Current Concepts in Craniofacial Embryology.

Chairman: Dr. G.H. Sperber (University of Alberta, Edmonton, Canada).

Dr. Drew Noden (Cornell University): Craniofacial Cell Movements and Tissue Assembly.

Dr. Mark W.J. Ferguson (University of Manchester, U.K.): Recent Advances in Palate Development: Growth Factors, Extracellular Matrix Molecules and Homeobox Genes.

Dr. Virginia Diewert (University of British Columbia, Vancouver, Canada): Primary Palate and Midface Morphogenesis.
