

## Appreciation to Referees

In 1992, *Fire Technology* published 15 peer-reviewed articles and 6 technical notes representing the work of 47 authors from Canada, Finland, France, Germany, Japan, Northern Ireland, England, and the United States.

The publisher, editors, and editorial review board of *Fire Technology* would like to thank the following individuals who have acted as referees for papers published and considered during 1992. Without their assistance, it would have been impossible to publish this prestigious journal with such high professional standards. The success of *Fire Technology's* peer-review process depends largely upon their significant and continuing contribution.

Melvin Abrams  
*Wheeling, IL*

Kathleen Almand  
*American Iron and Steel Institute*

Tommy Arvidsson
