

About the Authors

Allan M. Salzberg ("A Multiperiod Compartmental Model of the HIV Pandemic in the United States") is Chief of Staff, Department of Veterans Affairs Medical Center, Bath, New York. He holds a B.A. in chemistry from Cornell University, Ithaca, New York, the Ph.D. in physical chemistry and plasma physics from the University of Minnesota, Minneapolis, and an M.D. from the University of Maryland, Baltimore. Dr Salzberg's research interests include the epidemiology and modeling of HIV infection and full-blown AIDS in the population, including the study of antibiotic and antiviral pharmacokinetics. He has published in the *New England Journal of Medicine*, *Journal of Infectious Disease*, and *Journal of the American Medical Association*. Dr Salzberg's memberships include the American Medical Association, American Chemical Society, American Institute of Physics, and Operations Research Society of America.

Stanley L. Dolins ("A Multiperiod Compartmental Model of the HIV Pandemic in the United States") is a member of the United States Nuclear Regulatory Commission (ret.), Washington, District of Columbia.

Carol A. Salzberg ("A Multiperiod Compartmental Model of the HIV Pandemic in the United States") is a principal of Cybermed, Inc., Bath, New York. She received a B.S. in biochemistry from Cornell University, Ithaca, New York, and an M.S. in plant physiology from the University of Maryland, College Park. Her research interests include the toxicological and environmental effects of industrial chemicals.

Hokey Min ("A Multiobjective Vehicle Routing Problem with Soft Time Windows: the Case of a Public Library Distribution System") is an Assistant Professor of Operations Management, College of Business Administration, Northeastern University, Boston. He earned a B.A. in foreign studies from Hankuk University, Seoul, South Korea, an M.B.A. in production management from Yonsei University, Seoul, and M.S. in business administration from the University of South Carolina, Columbia, and the Ph.D. in management science from The Ohio State University, Columbus. Professor Min's research interests include logistics, materials and purchasing management, multicriteria decision making, and Japanese production management. He has published in a variety of journals including *Socio-Economic Planning Sciences*, *European Journal of Operational Research*, *OMEGA*, *Journal of the Operational Research Society*, *Computers & Operations Research*, and *Transportation Research—A and B*. Professor Min's affiliations include The Institute of Management Sciences, Operations Research Society of America, and National Association of Purchasing Management.

O. Benjamin Schoepfle ("A New Network Representation of a 'Classic' School Districting Problem") is an Assistant Professor, Department of Geography, Boston University. He holds a B.A. in sociology/American history from Northwestern University, Evanston, Illinois, an M.P.A. in policy analysis from Indiana University, Bloomington, and the Ph.D. in geography from the University of California at Santa Barbara. Professor Schoepfle's research interests include the creation of computerized economic and spatial analysis techniques in the management of existing systems of facilities or activities. He has published in the *Journal of the Operational Research Society*. His memberships include the Regional Science Association, Association of American Geographers, and Operations Research Society of America.

Richard L. Church ("A New Network Representation of a 'Classic' School Districting Problem") is Professor of Geography and past Chairman, Department of Geography, University of California at Santa Barbara. He received a B.S. in chemistry and mathematics from Lewis and Clark College, Portland, Oregon, and the Ph.D. in environmental systems engineering from The Johns Hopkins University, Baltimore, Maryland. Professor Church has published in a wide variety of journals

including *Geographical Analysis*, *Health Services Research*, *Transportation Science*, *Social Science and Medicine*, *Journal of the Operational Research Society*, and *European Journal of Operational Research*. He is a member of the Operations Research Society of America, The Institute of Management Sciences, and the Regional Science Association.

James J. Divoky ("An Evaluation of Environmental Protection Agency-Sanctioned Statistical Methods Used in the Assessment of Groundwater Quality") is Associate Professor, College of Business Administration, The University of Akron, Ohio. He received a B.B.A. in industrial management, an M.B.A., and the Ph.D., in decision science, all from Kent State University, Warren, Ohio. Professor Divoky's research includes the analysis of shortest path algorithms. He has published in *Management Science*, *Computers and Operations Research*, *Operations Research Letters*, *Educational Research Quarterly*, and *Journal of Education for Business*. Professor Divoky is a member of the Decision Sciences Institute, Operations Research Society of America, and The Institute of Management Sciences.

Mary Anne Rothermel ("An Evaluation of Environmental Protection Agency-Sanctioned Statistical Methods Used in the Assessment of Groundwater Quality") is Associate Professor, Department of Management, The University of Akron, Ohio. She holds a B.S. in mathematics and an M.B.A., both from The University of Akron, and the Ph.D. in quantitative methods from The Ohio State University, Columbus. Professor Rothermel's research interests include the use of multicriteria models in preference and decision analysis. She has published in *OMEGA*, *European Journal of Operational Research*, *The Educational Research Quarterly*, and *Journal of Education for Business*. Professor Rothermel is a member of the Decision Sciences Institute and The Institute of Management Sciences.

Richard W. Taylor ("An Evaluation of Environmental Protection Agency-Sanctioned Statistical Methods Used in the Assessment of Groundwater Quality") is an Associate Professor, Department of Management, The University of Akron, Ohio. He holds a B.S. and an M.S. in electrical engineering, both from the University of Florida, Gainesville, and an M.S. and the Ph.D., both in operations research from Georgia Institute of Technology, Atlanta, Georgia. Professor Taylor's research includes aggregation in mathematical programming. He has published in *Computers & Operations Research*. Professor Taylor's professional memberships include The Institute of Management Sciences, National Society for Professional Engineers, and the American Society of Quality Control.

J. P. Shim ("An Examination of Articles in the Eight Leading Management Information Systems Journals: 1980-1988") is Professor and Graduate Coordinator of Management Science/Information Systems, Department of Management and Information Systems, Mississippi State University, Mississippi. He holds a B.B.A. from Yeungnam University, South Korea, an M.B.A. from Seoul National University, South Korea, and the Ph.D. in business administration from the University of Nebraska at Lincoln. Professor Shim is the co-author of several books including *Micro Management Science: Microcomputer Applications of Management Science*, 2nd edn (Allyn & Bacon, 1990), *Micro Manager*, 2nd edn (Allyn & Bacon, 1990), and *AB:QM* (Allyn & Bacon, 1991). His research has been published in a wide variety of journals including *Socio-Economic Planning Sciences*, *OMEGA*, *Computers & Operations Research*, *Interfaces*, *Long Range Planning*, *Journal of the Operational Research Society*, and *Social Science Computer Review*. Professor Shim's primary research interests lie in the areas of microcomputer applications of management science and management information/decision support systems. He is a member of The Institute of Management Sciences, Academy of Management, and The Financial Management Association.

John B. English ("An Examination of Articles in the Eight Leading Management Information Systems Journals: 1980-1988") is an Assistant Professor of Management Information Systems, Computer Science and Computer Information Systems Department, Pittsburg State University, Pittsburg, Kansas. He received a B.S. in business administration from William Carey College, Hattiesburg, Mississippi, and an M.B.A. and D.B.A., both from Mississippi State University.

Professor English's research interests focus on the use of knowledge-based or expert systems in quantitative analysis and microcomputer-based information systems. He is a member of The Institute of Management Sciences and Institute of Resources Management.

J. Yoon ("An Examination of Articles in the Eight Leading Management Information Systems Journals: 1980–1988") is currently a doctoral candidate in Business Information Systems and Quantitative Analysis, Department of Management and Information Systems, Mississippi State University. He previously received a B.S. in finance from Indiana State University, Terre Haute, and an M.B.A. from Mississippi State University. Mr Yoon's research interest is in end-user computing.

Arnold Reisman ("A Taxonomy for Manpower Forecasting and Planning") is Professor and Past Chairman, Department of Operations Research, Weatherhead School of Management, Case Western Reserve University, Cleveland, Ohio. He holds a B.S., M.S. and the Ph.D., all in Engineering from the University of California at Los Angeles. His research interests are varied and include such areas as knowledge systems, countertrade, and manpower planning. Professor Reisman has edited, co-edited, or authored 12 books or monographs and has published more than 100 papers, articles, and chapters in books. His articles have been published in a wide variety of journals including *Socio-Economic Planning Sciences*, *Operations Research*, *IEEE Transactions on Engineering Management*, *Industrial Marketing Management*, *International Journal of Production Research*, *OMEGA*, *Interfaces*, *European Journal of Operational Research*, *Journal of Dental Education*, *Management Science*, and *Medical Care*. Professor Reisman is listed in *American Men and Women of Science*, *Outstanding Educators in America*, and many editions of *Who's Who*. His many professional affiliations include the Operations Research Society of America, The Institute of Management Sciences, American Association for the Advancement of Science, American Society for Engineering Education, Society for Advanced Medical Systems, and the American Society for Health Services Research.

Moon Ho Song ("A Taxonomy for Manpower Forecasting and Planning") is an Associate Professor of Operations Research, National Defense College, Seoul, South Korea. He holds a B.S. in engineering science from Korea Military Academy, Seoul, an M.S. in operations research from the U.S. Naval Postgraduate School, Monterey, California, and the Ph.D. in operations research from Case Western Reserve University, Cleveland, Ohio.

Fidelis Ikem ("A Taxonomy for Manpower Forecasting and Planning") is an Associate Professor, Department of Information and Decision Sciences, Virginia State University, Petersburg. He holds a B.S. in mathematical sciences from Metropolitan State College, Denver, Colorado, an M.S. in mathematical sciences from Clemson University, Clemson, South Carolina, and the Ph.D. in operations research from Case Western Reserve University, Cleveland, Ohio. Professor Ikem's research interests include models for analyzing health care systems in developing countries. He is a member of The Institute of Management Sciences, Operations Research Society of America, and the Decision Sciences Institute.

Stelios H. Zanakis ("A Multicriteria Approach for Library Needs Assessment and Budget Allocation") is Professor and Founding Chair of Decision Sciences and Information Systems, College of Business Administration, Florida International University, Miami. His degrees include a Diploma in mechanical and electrical engineering from the National Technical University of Athens, Greece, and an M.S. in statistics, an M.B.A., and the Ph.D. in business administration, all from The Pennsylvania State University, University Park. Professor Zanakis's research interests center on the development of multicriteria decision support systems, heuristics, and statistics/optimization interfaces. His research has been widely published in such journals as *Decision Sciences*, *European Journal of Operational Research*, *Journal of the Operational Research Society*, *Management Science*, *Naval Research Logistics*, *OMEGA*, *Interfaces*, *Industrial Engineering*, *International Journal for Production Research*, and *Computers & Operations Research*. Professor Zanakis's memberships include The Institute of Management Sciences and the Decision Sciences Institute.
